

# Say Goodbye To Your Boss - Work At Home!

## Start your own Medical Transcription at Home Business

Say goodbye to your boss!  
Let me show you how...

## Medical Transcription At Home! The Start-Up-System for running your own home business!

Are you interested in medical transcription but don't know where to begin? Are you looking for better money and the opportunity to say goodbye to your boss?

I've had a medical transcription at home business for fourteen years, and I can help you get started in the shortest time possible.

- Do you want flexibility?
- Do you want to make your own hours?
- Do you want to make \$25.00 to \$35.00 an hour? (That's realistic earnings, not hype.)
- Do you want to be your own boss?
- Can you work on your own?
- Do you enjoy typing?

If you answered yes to these questions, [medical transcription](#) at home could be for you. It's not a

get rich scheme, it does take work and commitment, but it's so worth it to have the freedom and independence that comes with it.

A lot of people think about starting their own business, but don't know where to begin. Others worry about failure. You don't have to worry with medical transcription because you can start small and build up your business at your own pace, in your spare time. You don't have to give up a job to start medical transcription at home if you don't want to. That's what is so nice about it.

I have enjoyed helping many people get into this business over the years; there's plenty of work for everyone. I can help you find the best transcription course or school, and teach you how to get a medical transcription job or start your own company. With the right training you can be running your own business in a short amount of time. **I also offer ongoing FREE email and phone consults with no time limit, to get you where you need to be.**

Medical transcription at home is a real and legitimate work at home business that you can do. Not one of those awful scams that you hear about so often.

Before I launched the book on this website, I used to write out pages and pages of notes for all the people I helped. Not just for people that worked for me over the years, but also for the people I met that wanted to know how to start a medical transcription business. I still get asked several times a month how I got started with medical transcription.

I finally decided to write a book about it, which I finished in May 2003, and updated every year ever since. I wanted to write a no-nonsense, to the point, but in depth kind of book, that would help people get started in the shortest time possible. And so the book was born...It's not 300 pages long, full of fluff and filler, it's 119 pages full of powerful information to help you build your own medical transcription at home business. I take you from A-Z through the whole process. Click [HERE](#) to see the Table of Contents!

So what do you get?

- You will learn all my secrets that will cut your typing time by at least a third and still earn you more money!
- You'll learn how to charge for your work so you get the most money for your time. (Some medical transcriptionists are cheating themselves out of money and don't even know it.)
- I teach you how to get paid for lines you don't type, so you can make an extra \$15.00 an hour minimum, for free! (Usually much more).
- You will learn the best courses to take so you can start your own medical transcription business in the shortest time possible.
- You get the actual sales letter to send out to the doctors to get accounts - the one that landed me an account every time I sent it out.
- You will know the best programs and books to get to help you with your work.
- You'll learn about the patient privacy act and HIPAA act and how to apply it to your business.
- You will get fifteen different sample medical transcription notes to look through to get an

idea of what you'll be typing.

- You will be walked through an interview with the doctor and I tell you what to say to secure the account. You will walk away with all the information you need, including samples of his work to help you get started.
- You will hear success stories from people just like you. People I myself have helped get started in the medical transcription at home business.
- You will learn about various medical note formats and how to apply them to your work to save you hundreds of hours. You don't want to be typing pages of work when you don't have to.

You can have this downloadable e-book and bonuses right now! You can also print them out if you want to. It's easy to download; it's as simple as saving a file.

**Latest Testimonials**

Michele,

I had to write to tell you thank you. I bought your book and immediately read it and sent out 200 letters to doctors and clinics in my area. I had an interview yesterday and landed an account for a clinic with over 200 doctors and therapists.

I cannot begin to tell you what you have done for me. My dream of being my own business owner is finally coming true. The sky IS the limit. Thanks again,

Jennifer Nirschl

Orders are processed through Clickbank, a secure credit card server. I offer an unconditional 60 day money back guarantee.

Aloha Michele,

FYI... I'm a newbie and want you to know that I started my own at-home business in June 2003 because of all your great advice, information, and encouragement. Just wanted to say thank you.... starting my own business has been the best thing I've ever done in my whole life.

Mahalo Nui Loa (thank you very much in Hawaiian),  
Luana

Michele, I know you're busy, but, I just had to write and say, AWESOME E-BOOK! It is well worth the \$49.97. I am an RN, but trying to pastor a small Church. I think becoming an MT will allow me much greater flexibility. Thank you so much.  
Sincerely, Billy D. Haney

Michele,

I just downloaded the book and started to read. I could not stop reading it until I was finished. I am totally convinced that this is the career choice for me and now my husband and I are both looking into doing this at least part time. Thank You so much for the good information. Sincerely, Amanda Downs, Florida
